

Mr Steven Ian Lindley | Abridged CV

BSc(Hons) MBChB(Hons) FRCS FANZMOSS | General & Upper GI Surgeon
GMC: 7138711 | t: +44(0)7796687052 | e: steveilindley@gmail.com

Career Statement

I am a UK-trained Consultant General and Upper Gastrointestinal Surgeon at Worcestershire Acute Hospitals NHS Trust. Having completed a high-volume, RACS-approved ANZMOSS fellowship at St George Hospital in Sydney, I bring advanced expertise across benign UGI and complex hiatal surgery, bariatric and revisional procedures, using robotic systems (Da Vinci and Medtronic Hugo), and interventional UGI endoscopy. In my current substantive practice, I specialise in benign upper GI surgery, biliary surgery (including bile duct ultrasonography and exploration), abdominal wall reconstruction, and paediatric day-case surgery.

Beyond clinical practice, I maintain a strong interest in service development, digital health and AI integration, and patient safety. I am an active surgical educator, directing ATLS provider and instructor courses globally and serving on the UK ATLS Steering Committee. I am a trustee and director for Operation Hernia, having completed eight international humanitarian missions, including as lead surgeon. Alongside my global surgery work, I provide specialised trackside trauma care for the FIA Formula 1 and Formula E World Championships.

- British Hernia Society | ANZ Hernia Society | AUGIS | BBUGSS | Motorsport UK/Aus

Interests

I am an avid skier and aim to take an annual trip to the mountains. In summer, I enjoy water-based activities including sailing, diving, and more recently, kitesurfing. I maintain fitness through regular running and completed the Sydney Marathon in 2024. I have a strong interest in global travel, often combining this with work in global health projects, and motorsport medicine. At home, I enjoy hands-on DIY projects such as home renovation and self-taught carpentry, which I find a rewarding way to unwind.
